

“The whole experience is one I would recommend”

– Darrel Seibert
Atrial Fibrillation Patient

Technology is forever changing the way we view the world, the way we do business, the way we deliver health care.

At Summa Health, we are proud to offer the world’s smallest pacemaker to our cardiac patients who need their heartbeats regulated. The “Micra” leadless pacemaker is making a real difference for people like Darrel Seibert, and for our Heart and Vascular teams. The Micra pacemaker benefits patients, both young and old. Recovery time is minimal and patients are generally home from the hospital the next day.
