

“I’m just really grateful for the care I’ve gotten here.”

– Danielle Leasure
Breast Cancer Patient

At Summa Health’s Breast Multidisciplinary Clinic, treatment plans for the breast cancer patients are individualized. The clinic is tailored to each patient’s unique needs and all members of the care team are with the patient at one time discussing the best treatment options. The care provided is convenient, cohesive and carefully coordinated.

And for Danielle Leasure, the Breast Multidisciplinary Clinic is very personal. As she notes, “Summa really held my hand.”
