

Impact of COVID-19 Across Our Organization

A Three-Part Series

“COVID taught us a lot about how to take care of patients – how to screen patients, how to use PPE when we have a limited supply – and has prepared us well for the future.”

– Thomas File, M.D.
Chair, Infectious Diseases
Summa Health

Part Three

Hope Arrives

Resilience, Recovery and Renewal

The delivery of the Moderna® vaccine to Summa Health on December 22, 2020, represented a light at the end of the tunnel for many of our healthcare workers. With the arrival of the vaccine, Summa Health finally had a tool to help put an end to the pandemic.

Watch as Summa Health caregivers share what the vaccine's arrival meant to them and some of the lessons learned over the past year. They also express their deep appreciation for Summa Health employees and offer an outlook for the future as the COVID crisis continues.

Watch the video at summahealth.org/annual-report/2020.
